

# Recommendation for clinical Research in Indonesia

- **What should the government do to improve (in many aspect) clinical research in Indonesia ?**

# Back ground

- Indonesian Pop. : ~ 240 million .> Human resources, Research subjects
- Biodiversity: no 2.
- Tropical Countries: unique, Diversity in the tropical diseases.
- Many Hospitals: Competition among distric/prov. Central gov., private to build hospitals.
- High Spirit (among researchers to conduct research).

# Within

- No clinical research unit at hospitals.
- Many centers (Univ., Hospitals): Can Not performed Research.
- Collaboration within institution: minimal.
- Minimal National-International collaboration: to improve research (clinical) (human resources, and facilities).
- Some Collaborations are not simple (although possible).

# Recommendation: for the government

- Create Better environment to conduct research ?.
- Improve facilities?: MTA/ procedure
- Improve Human Resources for Clin. research?.
- Facilitate Collaboration ?
- Facilitate researchers in conducting research?  
(Importing goods/reagents, equipment etc.)

# Recommendation: for the government

- Create Better environment to conduct research ?.
- Policy to simplify financial report, including hospitals could become a site for research “independently”.
- Improve facilities?:
  - Socialize MTA and its procedure to get.
  - Established Clinical research unit at hospitals.

# Recommendation: for the government

- Improve Human Resources for Clin. research?.
- Facilitate Collaboration: actively engage in resolving issues regarding collaboration issues.
- Facilitate researchers in conducting importing goods/reagents, equipment etc.

**THANK YOU**

Terima kasih
